P&T/WIRELESS & NETWORKS COMM CHINA 2009

### FOR IMMEDIATE RELEASE

### APCON SHOWCASING LATEST TECHNOLOGY AT P&T WIRELESS IN BEIJING

*Exhibited products include INTELLAPATCH® Series 3000 switch featuring new aggregation and filtering solution INTELLAFLEX™*

**Wilsonville, Ore., Aug 24, 2009** – APCON, a leading manufacturer of integrated switching solutions, is showcasing technology at the P&T Wireless tradeshow September 16-20, 2009 in Beijing, China that aims to redefine network monitoring strategies for the enterprise. APCON (co-locating with partner Infolink in booth #W1243) is featuring an aggregation and filtering solution called INTELLAFLEX, designed to work in conjunction with its popular INTELLAPATCH Series 3000 switching chassis.

“We’ve seen a large jump in demand for our technology in China,” said Paul Milliren, International Sales Manager at APCON. “These new products reflect what customers need today – scalability, flexibility and security with a compelling total cost of product ownership.”

### **INTELLAPATCH Series 3000**

The Series 3000 represents the newest INTELLAPATCH family from APCON. It supports faster data rates as they evolve with cutting-edge network technologies – including 10 Gbps Ethernet and 8 Gbps Fibre Channel – and also supports high performance SFP+ optics allowing for higher port density and less power consumption.

### **INTELLAFLEX Packet Aggregator**

APCON's INTELLAFLEX is an innovative aggregation and filtering offering designed for enterprise networks. With APCON's combined switching, aggregation and filtering technology, users are able to electronically share an inventory of expensive monitoring devices – often distributed across multiple locations – while preventing oversubscription and data loss.

### **About APCON**

A pioneer in the field of physical layer technology, APCON is globally recognized as the leading provider of integrated switching systems. Organizations in over 30 countries currently depend on APCON solutions in their network infrastructures. Customers include Fortune 500 companies, government and military organizations, networking and computer OEMs, telecommunication and service providers, financial services firms, and medical companies. For more information, contact the company at 9255 SW Pioneer Court, Wilsonville, OR 97070 or go to [www.apcon.com](http://www.apcon.com).

### **About Infolink**

Infolink Computer Services (Asia) Ltd. is a privately held company that has been serving customers in China since 1997. Specializing in banking system integration, design and network connectivity, Infolink also provides network hardware and software solutions. Its offices in Hong Kong, Guangzhou, Beijing and Shanghai are strategically located to offer responsive customer service and support. For more information, contact the company at [www.infolink.com.cn](http://www.infolink.com.cn) or +86-20-8766-2416.
