

The Vietnam International Communications Summit & Expo 2007 (Vietnam Comm 07)

Press Release

Eight Limited

Hong Kong, China – **Eight Limited (EIGHT)** introduces its **Agile TV Modulators** tailor-made for SMATV systems, Hotels and small to medium size networks. The agile TV modulators come with two models. Frequency “agile vestigial sideband TV modulator” (MOD862BGIVSB) has RF output frequency range 47-862MHz. Setting the TV standards (B,G, I) and assigning video channels (E2-E69) are as easy as just pushing a button at the front panel which has a LED display for your easy operation. You can adjust the RF output level and audio input level by a screw driver. In addition to the VSB model, we have an economical “double sideband TV modulator” (MOD47862DSB). It has almost all the features as the VSB model and it is most popular for small projects where adjacent channel frequency plan is not required.

On the same product line, we have developed a good quality **mini distribution amplifier** specially designed for hotels, apartments, institutes, etc.. This amplifier has two options, 28dB gain (DA86228NR) and 34dB gain (DA86234NR). This is a push-pull amplifier with built-in adjustable gain and slope regulators. The maximum output level is 117dBuV. The power consumption is 230V/50Hz/6VA.

We also supply good quality optical transmitter, optical receivers, RF outdoor amplifier for CATV operators.
