

## PRESS RELEASE

### COMPATECH 1000: the cheapest way to produce hand rolls directly in line.

Adtech Provera, designer and manufacturer of small and large size coextrusion cast lines for stretch film, is proud to launch into the international and local market its brand new line: Compatech 1000.

The purpose has been to build an economical high tech line, thanks to Adtech Provera choose to rely on suppliers with proven experience and skilfull personnel.

The focus target of this line are small and medium producers but also converters: infact Compatech 1000 permits to produce 2 hand rolls directly slit in line with a total net output of 350 Kg/h, 500 Kg/h and 600 Kg/h.

This **innovative** line allows a significant saving in terms of investment and a very fast amortization: **profitable** is the right adjective that could better describe it.

The difference between Compatech 1000 and an usual 1 meter line is an easy installation and a compact design that reduced the occupied space to 50 m<sup>2</sup>.

These are the main features that make Compatech 1000 one of the top cast lines on the market and that realize expectations better than previewed.

After the successfully K Exhibition in Duesseldorf, Adtech Provera is already in contact with more than 50 plastic producers all over the world and it has brilliantly signed 14 order confirmations for this line. .

Adtech Provera always develops new technical and technological solutions for the stretch film market.
