

*Press Release***Zero Windows server downtime, fault-tolerance, high availability, disaster avoidance, disaster recovery, data replication and related solutions in Windows and Linux****Business:**

Providence Solutions is a Singapore -based, Asia-wide, high value-added provider of innovative technologies to system integrators and end-users that deliver quantum leaps in cost reduction, productivity, performance and profitability. Core competencies lie in fault-tolerance, high availability, disaster avoidance, disaster recovery, data replication and related solutions in Windows and Linux. We are customer-centric, starting with end-user needs-analysis, and recommend the right technology to fit the customer's requirements and budget. Our customers include the most demanding organizations in defense, manufacturing, security, banking, logistics and other industries in which high server availability, or uninterrupted computing without loss of data or transactions, is essential.

Product & Services:**MARATHON**

- **Zero downtime for any Windows application at low cost than an HA cluster**, using industry-standard servers
- No loss of data or transactions if a server fails
- Reduces costs. Only one application license, one server image on the network.
- Disaster-tolerance - redundant server at remote location
- See MM demo at <http://www.providencesolutions.net/products/marathon/index.html>
Click LIVE PRODUCT DEMO.
- Thousands installed worldwide, including Singapore and Malaysia. Phone for references.

NEVERFAIL

- **The ONLY technology architected specifically for Windows server high availability**, vs data replication, virtual storage etc. with HA retrofitted.
- Lower cost. Data replication and HA in one package, one price.
- Helps prevent failover through system monitoring and policy-based pre-emptive actions
- Clones entire primary server to secondary server, dissimilar servers
- Fails over **any Windows application** without elaborate scripting
- Applies patches, updates without rebooting.
- Out-of-the-box protection for SQLServer, Blackberry, Exchange, IIS, Sharepoint, File Server, more.

SHAOLIN LINUX HIGH AVAILABILITY

- Policy-based failover. Low cost. Easiest installation and setup
- Automatic fault -detection for continuous application availability if a server fails
- One console for many applications, clusters and sites

- System & application monitoring to help prevent failover
- Supports most Linux versions, cross platform support, unlimited flexibility
- Infinite cluster nodes, monitors workloads & QoS, intelligent failover to optimal servers

ADTRON SOLID STATE DATA STORAGE FOR HOSTILE ENVIRONMENTS - defence, manufacturing, transportation, health care, telecoms, aerospace, any high-stress storage need

- Protects against -
 - Shock, vibration, temperature & humidity extremes, particulate contamination
 - Anti-corrosion addressing salt & fog conditions
 - Altitude, atmospheric extremes
- Optimized for large block transfers
- Higher read/write performance
- Leading capacities, up to 224GB in 3.5" form factor

SHAREPOINT REPLICATOR

- Replicate any list type
- Compresses data and prioritizes transfers
- Uploads documents with no timeouts or latency

NETVAULT REPLICATOR – data replication, disaster recovery across all platforms

- Long list of technical and functional advantages
- Customers include NASA, U.S. Navy, Deutsche Telecom, Samsung

PERVASIVE SOFTWARE

- PSQL database
- World's most popular data conversion & integration tools
- From any source, to any target – data format, OS, unstructured data
- Includes the former Data Junction data integration products
- For EAI and B2BI, any XML over HTTP, data warehousing, ETL, legacy migrations, DB2, EDI, SWIFT, real-time, SAP & other ERP systems, RDBMS's, unstructured data & much more - on Windows, Unix and mainframes
